D: KR2002-26099 A (LG ELECTRONICS Inc.) 2002-04-06

The present invention suggests a dynamic searching method and apparatus of video contents for fast-forward operation using shot index information on the contents and the present play spot.

On the other hand, D relates to a fast-forward system and discloses a method of varying video play speed according to the complexity of video contents.

While the dynamic searching method described in claims 1-19 uses shot index information and the present play spot to decide play speed, D uses the complexity of motions in video contents to decide play speed.

Therefore, claims 1-19 of the present invention are considered to involve an inventive step under PCT Article 33(3).
